UHY

SUSTAINABILITY SERVICES | ESG

Experts in shaping pathways that help organizations place sustainability at the core of their business.

Your sustainability partner

At **UHY Cointegra** we bring **over 20 years of experience supporting organizations on their journey to integrate sustainability into their strategy and operations.** Our work is grounded in a solid and proven practice across key areas such as **sustainability diagnostics, double materiality assessments, sustainability statements and reporting (CSRD, VSME, EINF), strategic roadmaps,** and other key fields.

We are **an affiliated member of UHY Fay & Co and a member of UHY International.** We also serve as the UHY Sustainability Center of Excellence for Ibero-America, helping strengthen sustainability capabilities and services across the network in the region.

- **+20 years of experience**
- **Members of the ICJCE Sustainability Commission**
- **Members of the UN Global Compact**
- **Partners of Forética**
- **UHY Sustainability Center of Excellence for Ibero-America**
- **Accredited consultants:**

How can we help you?

ESG & Sustainability Diagnostics and Strategic Roadmap

We assess your organization's current position, identify ESG risks and opportunities, and develop a clear roadmap to integrate sustainability into your business model.

Double Materiality Assessment

We perform comprehensive double materiality assessments to identify and evaluate both the environmental and social impacts of your activities, and the risks and opportunities that may influence the value and long-term sustainability of your business.

Sustainability Reporting: CSRD | EINF | VSME

We support you in preparing your sustainability report in accordance with CSRD, EINF, or the VSME standard, tailoring the process to the maturity level and size of your organization.

Assurance | Sustainability Report Verification

We provide independent verification of ESG data to enhance the transparency, reliability, and credibility of your sustainability reports, helping build trust among stakeholders and ensuring alignment with regulatory and reporting standards.

Certifiable Sustainability and ESG Management Systems

We support organizations in understanding, developing, and implementing the structural elements required to manage sustainability effectively and achieve recognized certifications, including **IQNET RS10 | B CORP | EFR | SGE 21.**

Management System Evaluation and Internal Audit

We assess and audit management systems to evaluate their performance, ensure alignment with strategic objectives, and identify areas for continuous improvement.

Carbon Footprint Assessment

Reduction and decarbonisation plans. We calculate carbon footprints across all three scopes, support registration with the **MTECO,** align decarbonisation strategies with the **SBTi,** and assist organisations in meeting the requirements of **RD 214/2025.**
